#### ENJOY YOUR ENAMELWARE.

**Every product of Emalco Enamelware is handmade and every imperfection gives it its uniqueness.**

Enamelware can last for generations. Wouldn't it be amazing to leave such a relic for your great-grandchildren? Imagine the history connected to it: camping with friends, dinner on the porch, travels and adventures...

The history that will be written on your enamelware can enrich it or damage. It all depends on how your enamelware is treated. Here are some rules to help you save it for years to come:

- Tea or food can stain the enamel. That's natural process and don't worry when it happens.
- You can use the enamelware on the induction cooker, gas and electric stove, in the oven, in the bonfire, in the dishwasher, fridge and freezer.
- Do not use abrasive cleaning pads or gritty soap powders.
- Do not use damaged enamelware for hot food and beverages.
- Do not use vinaigrette for cleaning.
- Do not use in the microwave.
- Enamel is a hard material that can survive a lot. However, exposed to a big pressure it will break (just like glass). Don't throw your enamelware.

These packing options are available for standard mugs, bellied mugs, and tumblers.  
If you need boxes for other enamelware, please let us know.

## PREMIUM PACKING FOR BETTER BRANDING
